

Conisance Access Management and Open Banking Summit

14 November-15 November, 2019
London, UK

INTRODUCTION

Conisance Access Management and Open Banking Summit is a path-breaking networking forum that will bring together key decision-makers from the world's leading Organizations, Start-Ups, and Governments.

With thought-provoking Case Studies, Keynotes and Panel Discussions, this summit will address the forthcoming challenges and set new benchmarks in Digital Identity, Digital Onboarding, and Open Banking.

INTRODUCTION

Discovering the true potential of the robust Digital Identification Systems will help many gain access to their rights and services. We help you explore the role of Banks and Financial Institutions in setting a global benchmark for Digital Identity by leveraging emerging technologies, as the inclusion frontier presents a massive \$380 Billion opportunity for Global Business and Economic Development

Embracing the rapid developments in technology like AI, Big Data, Biometrics, Blockchain, etc. has not only helped financial institutions transform their legacy, but also raised the standard of customer experience, forever.

You can get your hands on the optimal on-boarding strategies that will play a critical role in meeting your business goals.

Open Banking, as we know it, may become outdated before it even takes off as there is an opportunity to leap into an integrated marketplace called Open X.

Hence, the focus will shift from Products to Customer Experience, Assets to Data, Shared Access instead of Ownership along with Collaborations. We bring alive the evolution of concepts like Lifestyle Banking, Hyper-Personalization, Opti Channel experience and more!

WHY US

To make the most out of your time, we bring the most relevant and compatible players under one roof. We are diverse with a department, region and profession based mix of participants for best networking opportunities. Alongside, Conisance App will soon coming to enable a virtual platform for conference like engagement to which all participants to CAMOB will get full 1 year free access

Fast-track your long term collaboration goals by efficiently engaging with the right people prior, during and post the summit
